

## **Seminar in Translational and Clinical Imaging**

**Presented by Hossein Jadvar**

**Associate Professor of Radiology and Biomedical Engineering  
Director of Radiology Research**

In this course, we explore the expanding role of imaging in translational and clinical research. This workshop will identify new research opportunities and techniques. It will discuss the resources at USC that are available to foster imaging studies, and how to develop collaborative relationships to advance imaging research. It will survey various funding possibilities and assess elements of successful proposals for imaging-related awards in clinical and translational sciences.

**Who Should Attend:** Course is designed for USC Investigators interested in advances in imaging research

**University Park Campus**

**Office of Research Advancement**

**New Credit Union Building**

**3720 South Flower Street, Room 329**

**Wednesday, October 10<sup>th</sup>, 2007**

**4:00 PM – 6:00 PM**
